EXISTING CONDITIONS

Brick should be repointed with soft mortar Type N or Type O that matches historic mortar in color, composition, and joint profile. Current inappropriate mortar should be removed from joints by hand to not further damage the historic brick. New mortar that matches the historic mortar will greatly improve the appearance of the building.

New flush mounted-sign should be installed on the south wall of the building.

New projecting sign with Route 40 symbol should be installed on south brick pier. Sign should be attached through the brick mortar joints.

Vinyl window graphics should be installed centered on display windows.

Existing metal bulkhead, door frame, and double-hung window frames should be painted to match the blue from the new signage.

PROPOSED DESIGN

Historic National Road Interpretive Center

106 S. Fifth St.
Vandalia

OFFICE OF LIEUTENANT GOVERNOR PAT QUINN

ILLINOIS MAIN STREET PROGRAM

The Illinois Historic Preservation Agency, through the Illinois Main Street Program, has provided this free design assistance to qualified property/business owners in the officially designated Main Street district. This conceptual rendering is based on information supplied to the staff. Should obscured architectural details or problems be revealed during the work, the local project manager and/or the staff architects should be consulted.
